[www.pnpusa.com](http://www.pnpusa.com)

During the past fifteen years we have been providing high-quality products to industries such as the chemical; petro-chemical; oil and gas; power generation; fertilizer, glass-making and steel mills. Our mission is to provide excellent customer service and ensure top rate product quality and on-time delivery. As a result of meeting this mission over the past 15 years, we have developed techniques that can ensure customization our products to suit your specific industry and order requirements and delivering the order in an efficient manner.

Our products are manufactured in strict accordance with internationally recognized and accredited quality control standards including AWS, ASME, ASTM and AST. We also comply with many European industry standards. We ensure all our manufacturing facilities comply with the strict guidelines established under standards organizations such as ISO9001, ISO9002, ISO14000, ASME, AWS, Lloyds, TUV, CE, PED and other world-standard certificates or licenses.

We maintain a quality management system which monitors the process from selection of raw material through to final inspection and packaging. Before completion, all of our products undergo rigid tests including the testing of chemical and mechanical properties, metallographic, hardness, impact, ultrasonic, hydrostatic, liquid-penetrant and X-ray.

We strive to sustain our customers' satisfaction at the highest level: Our product quality is our assurance and guarantee.

We are ready to assist you in any way that we can. To enquire further about our product line or to place an order please email or fax your questions or order requirements, including your name, company name, address, telephone / fax number, specification, quantity and terms of delivery to our regional sales offices.
